

Revolutionise your VRU testing with
360-degree mobility

LaunchPad™ Spin

The LaunchPad Spin is the ADAS target platform that brings new levels of manoeuvrability to VRU testing. Its turn-on-the-spot, single wheel steering gives it the ability to rotate 360 degrees in an instant, so your testing can closely replicate the rapid changes in direction that are common to real-world pedestrian behaviour. Plus, its top speed of 30km/h also makes it capable of testing scenarios involving cyclists and e-scooters.

The LaunchPad Spin is a vital tool to enable your development programme to make the jump from basic regulatory testing of ADAS functionality to the sophisticated perception and classification required by autonomous systems.

Limitless 360° steering for
turn on the spot rotation

Rapid acceleration of up to 3 m/s²

30 km/h top speed with target fitted

Integrated GNSS inertial navigation
unit for 2 cm positioning

Aluminium chassis with IP67
weather resistance

Euro NCAP approved

Compatible with the Soft Pedestrian
360™ and Soft Bicycle 360™

44 tonne truck drive over capacity

Common software interface
with AB Dynamics ADAS
platforms and driving robots

Hot-swappable batteries
for extended running

Specifications

Dimensions	892 x 868 x 65 mm
Weight	39 kg (excluding batteries)
Top speed	30 km/h
Maximum acceleration	3 m/s ² (0-20 km/h)
Manoeuvrability	Highly controllable with single +/-90° steered front wheel and independent drive motors
Payload	Pedestrians, cyclists, e-scooters, animals. Maximum 15 kg
Batteries	High-capacity Lithium-ion battery packs 540Wh, rapid battery swap system
Weather resistance	Fully sealed electronics, waterproof to IP67

The LaunchPad Spin has been specifically designed to meet the demands of urban testing environments.

- Upgrade legacy belt driven systems with a fully mobile platform and meet UNECE test procedures with ease
- Join the forefront of heavy commercial vehicle safety by incorporating VRU targets in challenging urban scenarios
- Keep up with Euro NCAP bicycle and pedestrian test requirements with additional capability for e-scooter and animal targets

About AB Dynamics

AB Dynamics is a leading global provider of automotive test and verification solutions that facilitate the development of vehicles that are safer, more efficient and sustainable. As part of the AB Dynamics Group of companies we enable customers to develop and test in virtual environments, validate on the track and then evaluate vehicles on public roads.
